

UNIQUE EPOXY RESIN TABLES

Each piece is handmade in order to highlight and preserve its beauty.

Furniture is one of the defining interior décor elements that give character to a brick and mortar structure, making it comfortable and suitable for occupancy. Its history dates back to the Neolithic Period when beds, dressers, and cupboards were fashioned out of stone. As time passed stone got replaced with wood, and over the years furniture has become associated with art, a statement maker, and a trendsetter within the home décor circles.

In that context, the trend that has taken the interior designing world by storm in recent years is epoxy resin furniture. It's a spectacular amalgamation of wood and metal with resin that brings forth the mystic and awe-inspiring creation of semi-transparent, colorful masterpieces. Epoxy resin furniture is famous for giving the interiors an ethereal feel unmatched by any other.

LOOKING FOR A HANDMADE PIECE FOR YOUR HOME OR BUSINESS?

Instead of trying to buy something to fit a space, we build the furniture specific for that space. Whether you're looking for a custom conference table or coffee table, Wravorski is sure to build you the perfect piece, that will last lifetimes.
